

JUNE CRESPO

(1982, Pamplona, ES
-lives and works in Bilbao, ES)

June Crespo's practice is a sensual analysis of contemporary models of representation, commenting on the actual and symbolical dynamics enveloping the female body (visible for example in the incorporation of magazines catering to a female audience in her sculptural sets). Crespo's interest in the concrete and corporeal conditions of the object/body, as well as in the immaterial contexts where it circulates and shifts, questions contemporary life's composite configuration made out of material and discursive dynamics.

June Crespo obtained her BFA from the Universidad del País Vasco and she recently completed a residency at *De Ateliers* (Amsterdam).
